Text Input Layer

```
graph LR; Application[Application] --- ApplicationInterface[Application Interface]; ApplicationInterface --- InputProcessor1[Input Processor 1]; ApplicationInterface --- InputProcessor2[Input Processor 2]; ApplicationInterface --- InputProcessor3[Input Processor 3];
```

The diagram illustrates the architecture of a Text Input Layer. On the left, a blue vertical bar represents the 'Application'. A horizontal line connects this bar to a yellow rectangular box labeled 'Application Interface'. From the right side of the 'Application Interface' box, three lines branch out to three separate boxes: 'Input Processor 1' (dark green), 'Input Processor 2' (medium green), and 'Input Processor 3' (light green). These three input processors are arranged vertically. The entire system is labeled 'Text Input Layer' at the bottom.
